# My Software Testing Portfolio

Bringing Quality and Confidence to Software Solutions

# About Me

I am a highly motivated Software Quality Assurance professional with comprehensive experience in delivering robust and reliable software solutions. My expertise spans across the entire Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC), ensuring adherence to the highest quality standards.

## Dedicated Professional

A passionate software tester specialising in rigorous manual and automated testing of complex web and mobile applications.

## Quality Advocate

Committed to continuous learning, adopting best practices, and driving the delivery of high-quality, user-centric software.

# Key Expertise & Skills

My proficiency in diverse testing methodologies and tools enables me to tackle multifaceted challenges in modern software development environments.

### Collaboration
Working seamlessly within Agile and Scrum teams.

### Analytical Mindset
Deconstructing complex systems to identify potential vulnerabilities.

### Problem-Solving
Efficiently diagnosing, tracking, and resolving software defects.

### Effective Communication
Clearly articulating findings and recommendations to stakeholders.

# Technical Proficiencies

A strong command of cutting-edge tools and programming languages is fundamental to my testing approach.

**1** **Programming**
Java, Python

**2** **Automation Tools**
Selenium WebDriver, Cypress, Playwright, Appium

**3** **API Testing**
Postman, JMeter, SoapUI

**4** **Test Management**
Jira, Azure DevOps, TestRail

# Services I Offer

→ **Functional & Regression Testing**

Ensuring software features meet specifications and remain stable after changes, including meticulous regression test suites.

→ **Exploratory & Usability Testing**

Discovering defects beyond formal test cases and evaluating user experience for intuitive design and flow.

→ **Test Automation Development**

Implementing robust automation frameworks using tools like Selenium, Cypress, and Appium for efficiency and speed.

→ **API & Performance Testing**

Validating API functionality and assessing application responsiveness, scalability, and stability under various loads.
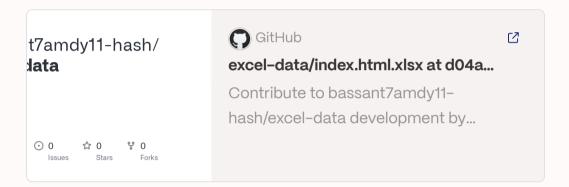

→ **Test Planning & Reporting**

Developing comprehensive test plans, designing effective test cases, and providing clear, actionable defect reports.

# Project Highlights

Showcasing my experience in delivering high-quality results across various impactful projects.

## Test case Design and Execution

**Led the design and execution of detailed test cases for Guru Bank, validating core banking operations and enhancing software reliability by identifying and resolving critical defects before release."**
